Wheat and Sunflower

Findings of the survey conducted through November, 27 2019. The areas under analysis in this report account for 90% of the crops planted area. The regional development data is published once planting is complete. The national planting and harvest progress, as well as the phenological data of the crops derive from the final area projection, while the moisture and crop condition derive from the planting progress to date.

First Soybean   Season 2019/2020
