## CORN

✚ Harvest expanded into 98% of the area. To date, production stands at 22 million tons.

✚ Weekly progress reached 0,3%. Our final production estimate remains at 22.5 million tons.

Moderate to abundant rainfall (10 to 50mm) is expected across the east of the Chaco region. However, the remaining plots located on the west could also be affected by the rain, delaying the end of the present campaign
